EDUCATION

Vellore Institute of Technology(VIT) , CGPA- 8.72 <i>Integrated Master of Technology in Artificial Intelligence</i>	Bhopal, IN <i>July 2021 – May 2026</i>
Nandha Central City School , 93.8% <i>Class 12th,CBSE</i>	Erode, IN <i>May 2021</i>
Nandha Central City School , 88% <i>Class 10th,CBSE</i>	Erode, IN <i>May 2019</i>

EXPERIENCE

Marketing Tech Intern <i>Xoxoday by GIIFT</i>	November 2024 – February 2025 <i>Bangalore, IN</i>
<ul style="list-style-type: none">Helping to create AI assistant to assist with everyday queries by customers CS Bot with adding NLP and LLM utility,with intent detection and free flow capability reducing the agent handover rate by almost 80% .Creating custom copilots using copilot studio and azure AI studio to cater HR queries by employees to reduce human involvement and efficiently utilize time	
Web Development Intern <i>Humans of Chhattisgarh</i>	January 2023 – March 2023 <i>Chhattisgarh, IN (Remote)</i>
<ul style="list-style-type: none">Collaborated with a team of web developers to design and launch a website that showcases the organization's work and features regular blog posts, enhancing online presence and engagement	

PROJECTS

Viskk (LLM Fine-tuning) Python, Deep Learning, OpenAI,LLM	October 2024
<ul style="list-style-type: none">Developing LLM-based applications to enhance the user experience and streamline the efficiency of email applicationsBuilding a mail generation system using Meta's LLaMA model to automate and optimize email composition and responses	
Khoya Paya (Face Identification) Python, Deep Learning, Computer Vision	May 2024
<ul style="list-style-type: none">Implemented a face recognition system using advanced image processing and object detection techniques to match and identify faces from a pre-stored image databaseUtilized a Computer Vision library to calculate and evaluate confidence scores for matched facesDesigned the application to leverage Aadhaar card data, enabling government officials to assist lost individuals with memory issues or missing children in reuniting with their families	
CNN-Based Fruit Quality Detection Python, Deep Learning, Neural Networks, Dataframes	August 2023
<ul style="list-style-type: none">Trained a neural network to assess and determine the quality of fruit based on its imageImplemented Convolutions using EfficientNet model to train and test on 2D imagesVisualized the confusion matrix to present the results and performance metrics of the model	

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS, Figma, Canva
Frameworks:Tensorflow, PyTorch, Scikit-learn, Hadoop
Developer Tools: Git, Google Cloud Platform, VS Code, PyCharm, IntelliJ, Google Colab
Libraries: Pandas, NumPy, Matplotlib, scikit-learn, cv2, seaborn, Keras, Tensorflow, PyTorch

ACTIVITIES

- Participated in Innovation and Emerging Trends in Computing and Information Technologies (IETCIT) 2024 conference and was invited to showcase our research paper.
- Graphics Team lead at Omdena VIT Bhopal local chapter where I Led a team of creative professionals dedicated to producing high-quality content for social media platforms, driving engagement and brand visibility
- Completed a hands-on course on Generative AI with Diffusion Models by NVIDIA, building and training conditional image generation models using U-Net and classifier-free guidance.
